

**“Advances in external optical modulators for analog fiber link applications”,** pp. 229 - 234

P. K. L. Yu, I. Shubin, X.B. Xie and W. S. C. Chang

**Abstract** – This paper presents an overview for the advances of the external optical modulators, in particular semiconductor electroabsorption modulator, for analog applications such as CATV, antenna remoting and wireless communication systems. Research frontiers in external optical modulators are described.
