

Call for Papers

International Journal of Microwave and Wireless Technologies:

Special Issue on GaN in Europe

About of the journal

International Journal of Microwave and Wireless Technologies was launched at the beginning of 2009, publishing six issues a year. The official journal of the EuMA, it aims to reinforce the presence of European Microwaves in the landscape of the scientific and technical literature. *IJMWT* provides academic and industrial researchers with an opportunity to promote their work and to stay connected with the most recent developments of Microwaves and Wireless technologies. The journal is published in association with Cambridge University Press, and is disseminated worldwide in print and through the Cambridge Journals Online platform.

Scope of the Special Issue on GaN in Europe

Over the last ten years there has been significant activity on microwave and RF GaN devices, circuits and applications in a number of European projects. This special issue aims to review the main achievements of these projects.

In addition to a number of invited papers the issue is open to contributed papers, and is scheduled for publication at the beginning of 2010.

Contributors are invited to submit their papers (6-8 pages) to the invited editors [Sylvain Delage](#) (Alcatel-Thales III-V Labs, France) and [Ruediger Quay](#) (IAF, Freiburg Germany). A copy should also be sent to the journal (ijmwt@brive.unilim.fr).

Closing dates for submissions is 15th November 2009.

Upon acceptance, the paper will be published in print, as well as electronically via Cambridge Journals Online <http://journals.cambridge.org/mrf>. *IJMWT* publishes all accepted papers online ahead of print in *FirstView*. All papers are given a DOI (Digital Object Identifier) which enable them to be referenced as soon as they appear online.
