

International Journal of Microwave and Wireless Technologies

International Journal of Microwave and Wireless Technologies publishes original papers on all aspects of microwave and RF research including applied electromagnetic theory, components, analogue and mixed-signal circuits, systems, optical-microwave interactions, electromagnetic compatibility, industrial applications, biological effects and medical applications. The Journal also publishes high-quality reviews on these subjects and review authors are encouraged to contact the editor before submission.

To submit their manuscript authors should email:
raymond.quere@xlim.fr

Original Work

Submission of a manuscript implies that it has been approved in its final form by all the named authors, that it reports on unpublished work and that it has not been published or submitted for publication, in whole or in part, elsewhere. It is the responsibility of the named author to ensure that these conditions are fulfilled.

Copyright

Authors of articles published in the journal assign copyright to Cambridge University Press and the European Microwave Association (with certain rights reserved), and a copyright assignment form must be completed on acceptance of your paper.

Manuscript Format

The manuscript must comprise the following parts:

Title of paper

This should be clear and informative and make the contents of the paper clear to anyone who reads it.

Author names and affiliations

Full names (first name, initials, last name) of all authors should be provided along with their affiliation and address. A correspondence address with phone, fax and e-mail should also be provided.

Abstract

This should not exceed 200 words and should provide a short summary of the main aims, results and conclusions in such a way that it highlights the importance of the paper to the wider community, not only experts in the subject.

Keywords

There should be a maximum of six keywords, non-standard abbreviations should be avoided.

Main text

This should be split into appropriate sections and include an Introduction and a Conclusion. On submission Tables and Figures may be embedded into the text at appropriate points, however please read the **On Acceptance** section for instructions on how to submit your final manuscript.

Equations should be numbered consecutively as (1), (2), (3) etc. and, where necessary, referred to as such in the text.

Tables should be headed by a self-explanatory title and referred to consecutively as Table 1 etc.

Figures may be line drawings or photographs and should be headed by a self-explanatory title and referred to consecutively as Fig. 1 etc.

References in the text should be denoted as consecutive numbers in square brackets with one number per reference:

The work of Brown and Green [1] has shown that electroabsorption modulators represent one of the most interesting solutions.

For papers with more than two authors where authors are referenced in the text *et al.* should be used.

As described by Brown *et al.* [1], [2] the efficiency will be maximal if the resonance frequency is exactly the same as the sending frequency.

When authors are not directly referred to the reference should be in parentheses as follows:

Radio Frequency Identification (RFID) technology is very attractive for various applications in supply chain management or logistics [2]

List of References should be presented in the format below. Please note that the names of all authors should be given in bold, and that the journal name should be italicised and given in full, not abbreviated. Where known the article's Digital Object Identifier (DOI) should be included at the end of the entry.

Chapters in Books

[3] **Kiritsis, D., Jun, H.B., Xirouchakis, P.** (2008). Closing product information loops with product-embedded information devices: RFID technology and applications, models and metrics. In *RFID Technology and Applications* (ed. Miles, S.B., Sarma, S.E. and Williams, J.R.) pp. 169-182. Cambridge University Press, Cambridge.

On Acceptance

On acceptance the named author will be asked to supply a final version of the manuscript. To ensure accurate reproduction figures should be supplied separately as TIFF or EPS files. Line drawings should be at 1200dpi, black and white or colour images should be supplied at 300dpi.

Once a proof has been supplied only minor changes will be allowed. Authors should be aware that large numbers of changes may lead to the paper being returned to reviewers for approval, delaying publication.
